STANDARD PRODUCT CATALOGUE

Vast amount of stock at unbeatable prices

STOCK	Our global knowledge of the valve industry accompanied with our mighty buying power enables us to have a quality product on the shelf at unbeatable prices, with over 90% of our catalogue products being available for same day despatch. We consider ourselves to be the best supplier of industrial valves in the UK.
TECH HELP	If you require help in selecting the correct valve for your application, or require additional information on one of our catalogue products, then our experienced team are here to help. We have for your appraisal, technical drawings and full component break down sheets for all the products in our catalogue. Call 01744 762960 to get in contact with our technical team.
QUALITY	We have been very selective in choosing the correct manufacturers to put on our shelves. It is essential that all our products are manufactured to a very high standard and the relevant manufacturers have an approved accreditation system in place. All our products are manufactured in accordance to the relevant standard. Certificates of conformity, material certs and pressure test certs are supplied free at no extra cost. Lloyds certification available upon request.
PRICE PROMISE	We are confident that we are the most competitive valve supplier in the UK. We aim to price match any identical product if purchased from the UK.
DESPATCH	On most occasions, orders placed before 4pm can be despatched same day and delivered before 10am the next day and orders placed 1 hour prior can be collected from our works. Our 10,000 square foot warehouse allows us to hold your goods for your required call off.
ACCOUNTS	Setting up an account with Valve Center is easy. Once we have had a completed application form back it only takes minutes to set up an account. If you prefer we can take payment by credit or debit card. To request an account simply call our accounts department on 01744 762962 or email leannewiles@valvecenter.co.uk .

CUSTOMER SATISFACTION IS PARAMOUNT

Valve Center have been supplying valves, actuators and similar equipment since 1997. Our focus in that "customer satisfaction is paramount" has resulted in our customers returning year after year. This vision has enabled us to grow into the company we are today.

Quality—Our products must be suitable for duty and be manufactured to an excellent standard.

Service—To ensure that we try to go beyond the expected level of service and ensure that our customers are happy that they have used Valve Center.

Price—We aim to supply competitively priced goods whilst maintaining the high level of quality that is expected.

BRANDED STOCK

In addition to our catalogue product range, we also keep in stock a comprehensive range of well-known manufacturers. We supply many sites where specified manufacturers are only acceptable. It is to our commitment in selecting the correct brands for our shelves that we have framework agreements in place with the country's largest power stations. The branded names we keep in stock include Hattersley, Saunders, Hopkinsons, Spirax Sarco, Norbro, Rotork, and many more. See page IX for the full list of brands we can offer.

EXPERTS AT SOURCING

While this catalogue has a diverse range of valves, we understand it is impossible to have every valve on the shelf. With this in mind we recognise the importance to be constantly gaining knowledge of the market place.

So if it's a very large bore size or an exotic material our experienced team will source it for you.

ACTUATION

Valve Center are experts in actuation and currently have over 1000 actuators available from stock. We are able to offer a huge variety of types and brands of actuator. We can specify the correct actuator for your application and have the facilities to either directly mount onto your valve or via extension spindles or extension pedestals. Quarter turn, multi-turn, open/close or fully modulating applications are all within our standard portfolio.

ON SITE SERVICES

Use Valve Center's experience on your site. To help you correctly identify a valve or actuator, one of our trained engineers can be of assistance. We have visited sites all over the UK, allowing our customers to benefit from the peace of mind that when it comes to the installation, things will go as smoothly as possible with minimal down time.

VALVE REPAIR AND OVERHAUL

We can repair many types including parallel slide valve, gate and globe valves, ball valves and boiler equipment. Pressure relief valves can be refurbished, re-set, tested and the appropriate certification provided. In most cases refurbishment can be a more cost effective option to buying new but Valve Center can assess your equipment and if a replacement is a more sensible option, we can advise and quote you for a new valve.

OUR SISTER COMPANY

International Pumps is a stockist of a wide range of pumps and spare parts. It has distributor agreements in place with many of the leading pump manufacturers. Founded on similar principles to Valve Center, that "customer satisfaction is paramount" combined with importance to invest in stock, makes them your perfect partner for pumps. For a full company overview visit www.internationalpumps.co.uk or call 01744 762942.

MEET THE VALVE CENTER TEAM

Dean Bowden (Managing Director)

Experience: Owner of Valve Center and has spent all of his working life within the valve industry. Experience ranging from the manufacture, testing and machining of valves through to sales and technical backup.

Contact: deanbowden@valvecenter.co.uk Direct Number: 01744 762968

Jason Glover (General Manager)

Experience: Joined Valve Center in 2004 and has over 20 years experience within the petrochemical industry, 17 years dealing with valves and pipework, 11 years specifically within procurement and contracts.

Contact: jasonglover@valvecenter.co.uk Direct Number: 01744 762959

Leanne Wiles (Accounts Manager)

Experience: The last 20 years spent working within a managerial position and the last 10 years more specifically as an accounts manager for Valve Center.

Contact: leannewiles@valvecenter.co.uk Direct Number: 01744 762962

Vicki Davies (Sales Manager)

Experience: Involved in customer service since 2003 and more specifically, for the last 5 years, Vicki has accrued extensive knowledge of valves and pumps.

Contact: vickidavies@valvecenter.co.uk Direct Number: 01744 762967

Andrew Harvey (Sales)

Experience: With 7 years experience in the valve industry and involvement in a customer service experience role prior to that, Andrew is highly knowledgeable in this industry.

Contact: andrewharvey@valvecenter.co.uk Direct Number: 01744 762945

Chris Makin (Sales)

Experience: Chris has worked in sales, customer service and purchasing for almost 14 years and has also gained several relevant qualifications.

Contact: chrismakin@valvecenter.co.uk Direct Number: 01744 762949

Craig Wood (Sales)

Experience: Has had over 12 years of experience dealing directly with customers, the last 6 of them directly from within the valve and pneumatics industry.

Contact: craigwood@valvecenter.co.uk Direct Number: 01744 762948

Colin Ashcroft (Business Development and Customer Service)

Experience: Experience in direct sales and marketing for 2 years. Has been a trade supply specialist for the industrial and commercial sector for a year and has served a 3 year trade apprenticeship.

VALVE, ACTUATOR TYPES AND BRANDS WE OFFER

As you can see from the list below, with our vast knowledge of the valve industry, Valve Center can supply you any valve type that you require from a comprehensive list of manufacturers.

We can also offer direct equivalents to all the named brands.

Whilst most of our flanged valves are undrilled, this permits us

to drill them to your mating pipework, which as a result, you

the customer can benefit from quick delivery times when long manufacturers lead times are unacceptable. At Valve Center

we have in our possession most manufacturers data sheets and drawings, including manufacturers who are no longer trading.

This allows us to offer direct equivalents without any deviation.

ACTUATORS

Valve Center are experts in actuation and currently have over 1000 actuators available from stock. We are able to offer a huge variety of types and brands of actuator. We can specify the correct actuator for your application and have the facilities to either directly mount onto your valve or via extension spindles or extension pedestals. Quarter turn, multi-turn, open/close or fully modulating applications are all within our standard portfolio.

Supply

Valve Center are able to supply a huge range of actuators, switchboxes, position indicators, gearboxes, mounting kits, locking levers, spring return levers, chain wheels, interlocks and extension spindles to suit your requirements. Mounting kits and drive bushes can also be manufactured to suit specific requirements.

Types

Pneumatic, electric and hydraulic actuators are normal stock for Valve Center along with a huge range of mounting kits and gear boxes for multi-turn actuation or manual applications. Atex compliant electric and pneumatic actuators, switchboxes, solenoids and position indicators are held in stock. As well as the

standard double acting and spring return pneumatic and hydraulic actuators, we also are able to supply true spring return electric actuators and electric actuators with battery backup.

Assembly

We have the facilities to directly mount actuators, ancillaries and gearboxes to valves. We also have facilities to manufacture mounting kits, drive bushes and extension spindles for below ground applications. All of this can be done in any material and on short time scales.

Testing

Once valves and actuators are assembled it is standard procedure to test them to ensure they fully open and close and that any switches and position indicators perform as they should.

Brands

We can supply any brand of actuator and listed below is a list of the more common names we offer. We can also offer direct equivalents to many of these makes.

valve repair, test & certification

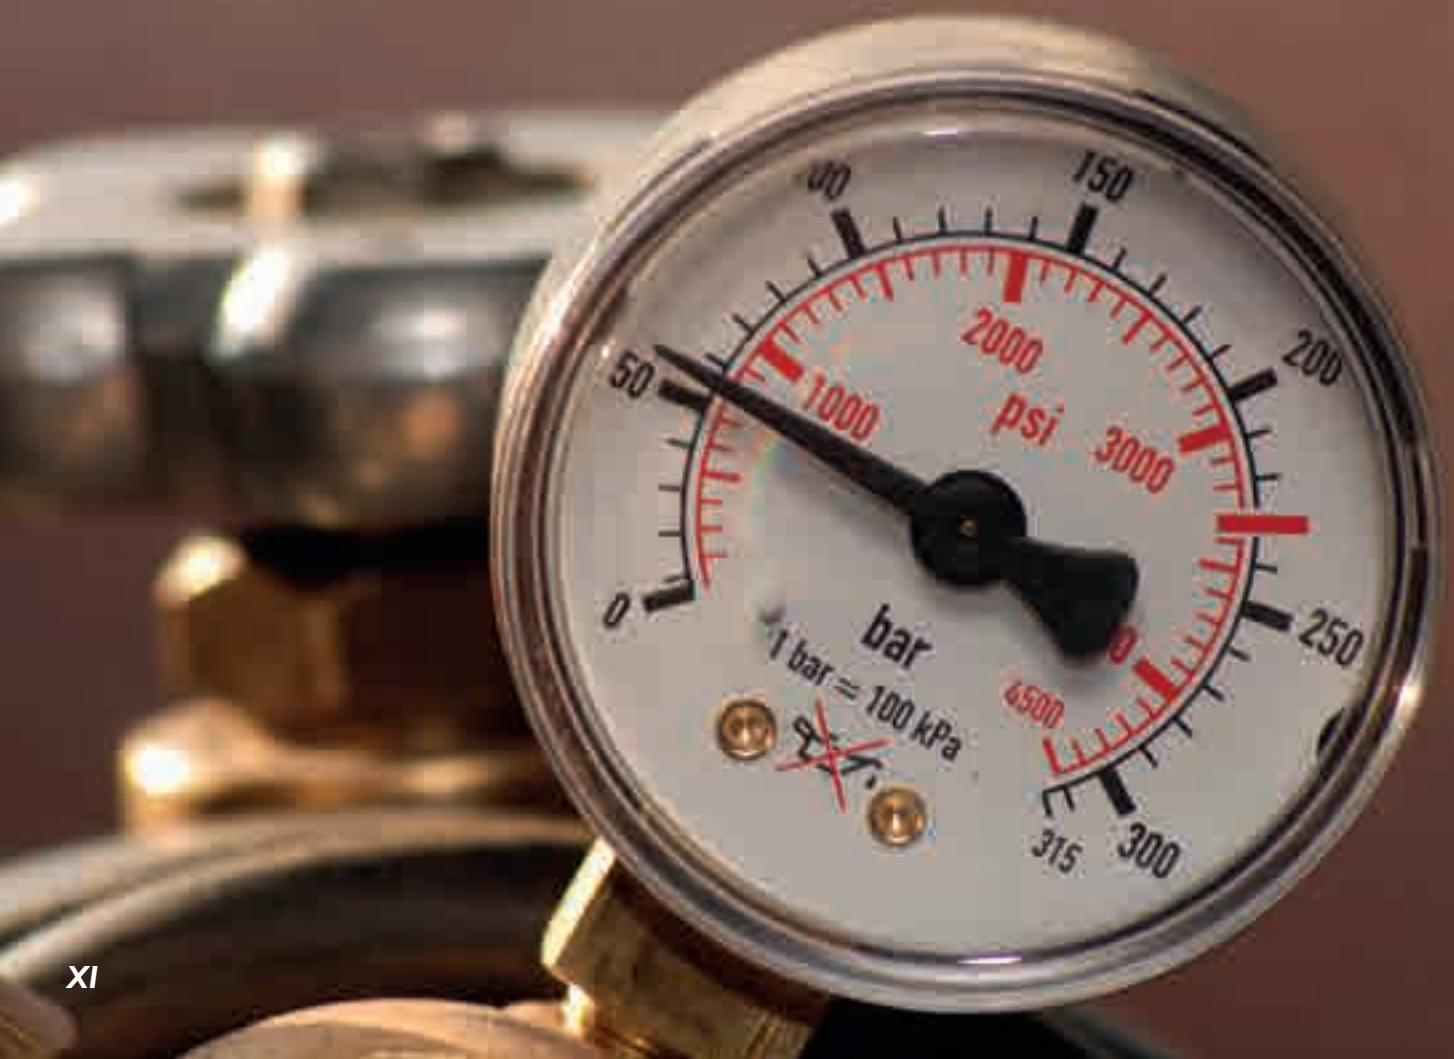

As well as supplying an enormous range of valves and related equipment, did you know that Valve Center offer a valve overhaul and testing service?

We can repair many types including parallel slide valve, gate and globe valves, ball valves and boiler equipment. Pressure relief valves can be refurbished, re-set and tested and the appropriate certification provided.

In most cases refurbishment can be a more cost effective option to buying new but Valve Center can assess your equipment and if a replacement is a more sensible option, we can advise and quote you for a new valve. Visit www.valvecenter.co.uk for more information on this and other services we offer. Alternatively, contact the office on 0844 69 333 49 or by email to sales@valvecenter.co.uk

On-site service: If you have a valve on-site that you need to replace and cannot identify specific details, we are able to provide an on-site service to properly identify what you require and then provide a like-for-like replacement without any need to modify your pipework.

Emergency contact number: We can be contacted out of our normal working hours, 365 days a year. If it's to access our stock, assistance on site or technical support, call 07860 947511.

GENERAL TERMS

Colours and designs may vary from the items shown in the catalogue.

**Customer service is paramount,
but don't just take our word for it**

“I've been dealing with Valve Center since 1998. I can honestly say that over the years I have found them to be a very reliable company. Whenever I have a valve enquiry I have found them to be knowledgeable and helpful. I would have no problems in recommending Valve Center to anyone in the industry.” —*Carl, British Nuclear Fuels (B.N.F.L.).*

VALVE CENTER

INDUSTRIAL VALVE STOCKIST, ACTUATORS & RELATED EQUIPMENT

Customer service is paramount, but don't just take our word for it

“For a number of years Valve Center have been my company of choice to source valves that are not a stock item in our stores. Working at a forty year old power station means that when we need to replace original installation valves they are usually obsolete, Valve Center have always been able to quote us for a direct replacement, more often than not at a price and delivery that beats any of the other valve companies that we have to try under our procurement rules.” — Trevor, Scottish and Southern Energy.

VALVE CENTER

INDUSTRIAL VALVE STOCKIST, ACTUATORS & RELATED EQUIPMENT

With Valve Center's expert knowledge of the Valve Industry and complimented with our diverse stock range, we have the capability to supply every sector of the process industry, in particular:

Automotive

Valve Center have repeatedly bid for, and won, supply orders for fire safe and anti-static stainless steel ball valves used by Bentley Motors. Other companies we have supplied for within this industry include Toyota, Vauxhall and Rolls Royce.

Chemical

Valve Center supply many blue-chip chemical manufacturers with a large variety of valves, examples include valves and spares supply to Croda Chemicals since 2004 and bellow sealed globe valves, prepared for chlorine duty, supplied to Huntsman Chemicals.

Fire Fighting

Valve Center have supplied valves, sprinklers and hydrants to various building companies and have repeatedly supplied products such as quick release fire valves to several of Her Majesty's Prisons throughout the country.

Gas

Valve Center successfully completed a project for National Grid to replace forty ATEX-compliant, manual and actuated butterfly valves on top of LNG storage tanks suitable for use within explosive environments.

Marine

Valve Center currently supply valves into the marine industry and our valves are even used on the QE2. We recently supplied a 1200mm butterfly valve for use on board a ship, which we had ABS-certified and supplied successfully, all on time. We also supply many other valves and can offer certification inline with the requirements of bodies such as Lloyds, DNV, Bureau Veritas, Germanischer Lloyd, TRB, TUV, RINA plus several others.

Oil

Valve Center currently supply to many off-shore oil producers and examples of our supply vary from valves as simple as standard cast iron butterfly valves through to a recent order to supply a 250mm modulating high pressure control type ball valve with duplex trim. The valve had to be ATEX-compliant, comply with strict specifications, and also customer witness tested.

Pharmaceutical

Valve Center recently supplied 22 hygienic pneumatically operated valves to Roche products in Italy. The valves were delivered ahead of schedule and feedback from the customer was excellent.

Power Generation

Valve Center hold a contract to supply like-for-like standard replacement valves for Scottish and Southern Energy and in addition, recently replaced several butterfly valves up to 700mm for a critical plant shutdown within the tight timescale.

Road Tankers

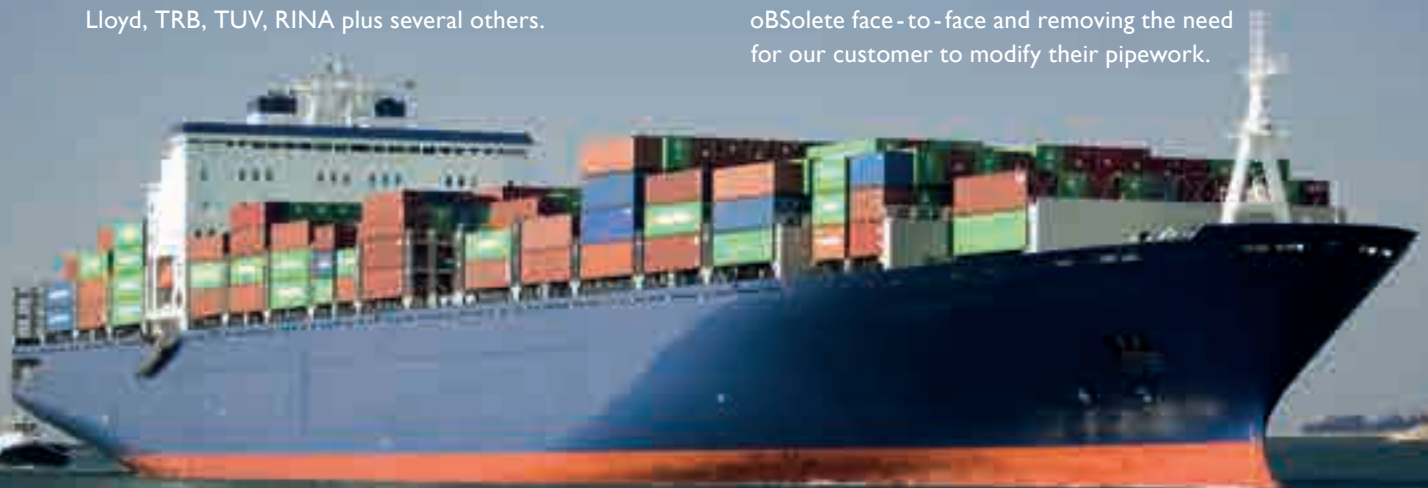

Valve Center are able to supply many standard and specialised valves for use on road tankers and were recently able to solve a problem by re-specifying a valve for the back of a tanker and successfully arranging its installation.

Valve Industries

Valve Center's vast stock and our relationship with most of the world's valve manufacturers, allows us to supply competitively many other valve companies, who's names we respectfully do not mention.

Water

Valve Center recently supplied 700mm cast iron swing check valves to replace existing damaged valves for United Utilities, matching the now obsolete face-to-face and removing the need for our customer to modify their pipework.

FLANGE INFORMATION

WHAT IS DN?

DN stands for 'Diameter Nominale'.
Put simply, it is a rough translation of mm from imperial sizes, assuming that an inch is 25mm.
We refer to a 12" flange as DN300, when in fact it is 304mm.

WHAT IS THE PCD?

The PCD of a flange is one of the critical dimensions.
PCD (Pitch Circle Diameter) is the distance from the centre of Two opposite bolt holes.

THERE ARE SEVERAL STANDARDS FOR FLANGES, FOUR COMMON SPECIFICATIONS ARE

British Standard—BS10	Table D Table E Table F Table G Table H Table J Table K	Table E is the most popular for applications with water. All dimensions are specified in inches.
Australian Standard—AS2129	Table C Table D Table E Table F Table G Table H Table J	These flanges are equivalent to the BS10 flanges, except that all dimensions are specified in mm. In some sizes, bolt holes are slightly larger to give better clearance.
American National Standards Institute (ANSI)	ANSI 125 ANSI 150 ANSI 300 ANSI 600 ANSI 900 ANSI 1500	Higher numbers denote higher pressures. Sometimes people use the word 'Class' instead of ANSI. e.g. an ANSI 150 flange might be called a 'Class 150'. All dimensions are specified in inches.
British Standard—BS4504	BS4504-6 BS4504-10 BS4504-16 BS4504-25 BS4504-40 BS4504-64 BS4504-100	PN6 PN10 PN16 PN25 PN40 PN64 PN100 Engineers use the prefix PN (Pressure Nominale). e.g. a BA4504-16 flange will commonly be referred to as a PN16. Generally, a PN16 flange is designed to withstand pressures up to 16 bar. All dimensions are specified in mm.

GUIDE TO COLOUR CODING:

	Excellent chemical compatibility.
	Good compatibility with minor effect, slight corrosion or discoloration.
	Not recommended with chemical having some moderate effect, potentially causing softening, loss of strength and swelling may occur.
	Severe effect—not recommended for any use.
	No data.

GUIDE TO COLOUR CODING:

	Excellent chemical compatibility.
	Good compatibility with minor effect, slight corrosion or discoloration.
	Not recommended with chemical having some moderate effect, potentially causing softening, loss of strength and swelling may occur.
	Severe effect—not recommended for any use.
	No data.

PLEASE NOTE that information within this chart should only be used as a guide in selecting materials for chemical compatibility. We recommend that you test the material with the chemicals and under the specific conditions of your application.

Results are based on a 48-hr exposure period and exposure beyond this period may result in alternative results. Variations in conditions, such as temperature, pressure, and concentrations can cause alternative reactions to material, even though it passed an initial test. Valve Center does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

GUIDE TO COLOUR CODING:

	Excellent chemical compatibility.
	Good compatibility with minor effect, slight corrosion or discoloration.
	Not recommended with chemical having some moderate effect, potentially causing softening, loss of strength and swelling may occur.
	Severe effect—not recommended for any use.
	No data.

VALVE CENTER

INDUSTRIAL VALVE STOCKIST, ACTUATORS & RELATED EQUIPMENT

Customer service is paramount, but don't just take our word for it

“We just wanted to say thank you for your help with the rush order today. You helped us to get our customer up and running quicker than most other companies could. We are very happy with the service you provide.”—*Andy Roberts from Airtec Filtration.*

Vast Stock

Our global knowledge of the valve industry accompanied with our mighty buying power enables us to have a quality product on the shelf at unbeatable prices, with over 90% of our catalogue products being available for same day despatch. We consider ourselves to be the best supplier of industrial valves in the UK.

Top Brand Names

In addition to our catalogue product range, we also keep in stock a comprehensive range of well-known manufacturers. We supply many sites where specified manufacturers are only acceptable. It is to our commitment in selecting the correct brands for our shelves that we have framework agreements in place with the country's largest power stations. The branded names we keep in stock include Hattersley, Saunders, Hopkinsons, Spirax Sarco, Norbro, Rotork, and many more. See page IX for the full list of brands we can offer.

On Site Services

Use Valve Center's experience on your site. To help you correctly identify a valve or actuator, one of our trained engineers can be of assistance. We have visited sites all over the UK, allowing our customers to benefit from the peace of mind that when it comes to the installation, things will go as smoothly as possible with minimal down time.

Experts at Sourcing

While this catalogue has a diverse range of valves, we understand it is impossible to have every valve on the shelf. With this in mind we recognise the importance to be constantly gaining knowledge of the market place. So if it's a very large bore size or an exotic material our experienced team will source it for you.

Valve Repair and Overhaul

We can repair many types including parallel slide valve, gate and globe valves, ball valves and boiler equipment. Pressure relief valves can be refurbished, re-set, tested and the appropriate certification provided. In most cases refurbishment can be a more cost effective option to buying new but Valve Center can assess your equipment and if a replacement is a more sensible option, we can advise and quote you for a new valve.

Our Sister Company

International Pumps is a stockist of a wide range of pumps and spare parts. It has distributor agreements in place with many of the leading pump manufacturers. Founded on similar principles to Valve Center, that "customer satisfaction is paramount" combined with importance to invest in stock, makes them your perfect partner for pumps. For a full company overview visit www.internationalpumps.co.uk or call 01744 762942.
